SXR AUDIO STAND

the foundation of great system performance

SXR AUDIO STAND

“The SXR Audio Stand, which has won product of the year from industry reviewers, is the last frame system you will ever need. It is designed to be infinitely configurable and infinitely re-configurable. This frame can be modified at anytime and will always look as if it was custom built for your system. I spent two years on the design and engineering of the SXR Audio Stand to provide excellent performance, value and infinite flexibility.”

*Michael Latvis, Chief Engineer
Harmonic Resolution Systems Inc.*

The SXR Audio Stand is a very high performance design that eliminates noise revealing a new level of musical performance. The frame is manufactured from billet machined aircraft aluminum and strategically placed polymer damping elements. This innovative design concept produces configuration flexibility and exceptional performance. The highly acclaimed HRS isolation bases load directly into the SXR frame as the shelf system. The SXR frame optimizes isolation base performance while offering infinite configuration flexibility and functionality. Any SXR frame can also be ordered in (or upgraded to) a reference level SXR signature design with the addition of the HRS SXR solid brace inserts.
